Opensource Technology

Opensource solution outlines Kak Infotech's proposed KAK cloud storage solution based on nextcloud open source software.

KakInfotech is a provider of website maintenance, hosting, and security services for commercial clients. We specialize in ensuring our clients' hosting or cloud storage remain secure, updated, and optimized. This is the reason, we always use certified products or services based on open source like nextcloud used by many other companies.

Should you have any questions, comments, or concerns after you've thoroughly reviewed this solution, I encourage you to leave a comment via emails or tickets for a log? I am automatically notified of any comments, and will be able to respond promptly.

The Nextcloud Android app makes accessing, syncing and sharing your files easy with its modern and intuitive interface. It naturally integrates with your self-hosted team collaboration tool to deliver excellent on-the-go experience. The client supports Android 4.0 and later and works with a wide variety of screen sizes and Android features.

✓ Display documents, photos, videos, audio files, as a list or thumbnails, sorted as you like.

✓ Stream media files (needs at least Nextcloud 14)

✓ Edit files on the phone built in or using other apps installed on your Android device.

✓ Local and server-side search

✓ Add, rename, copy, move and delete files and folders

✓ Keep your favorite files available offline

✓ Restore deleted files

✓ Share files with others

✓ Shared files view

✓ Simple contacts backup & restore

Swancloud Features: Collaboration

Swancloud Files- Enterprise File Sync and Share

Enterprise File Sync and Share offers direct, easy access to data through web, mobile and desktop sync clients.
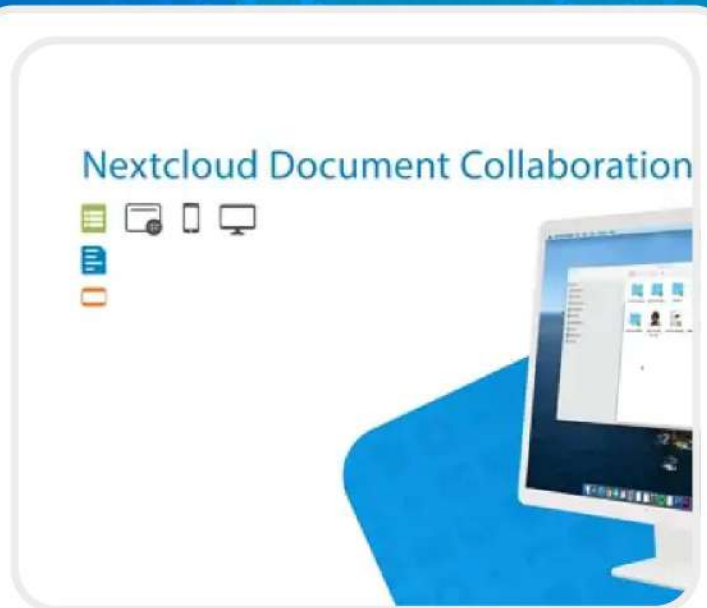

Seamless collaboration

The core strength of Nextcloud is its ability to enhance team productivity on the go with an easy user interface on mobile, web and desktop and powerful integrated document collaboration and communication capabilities.
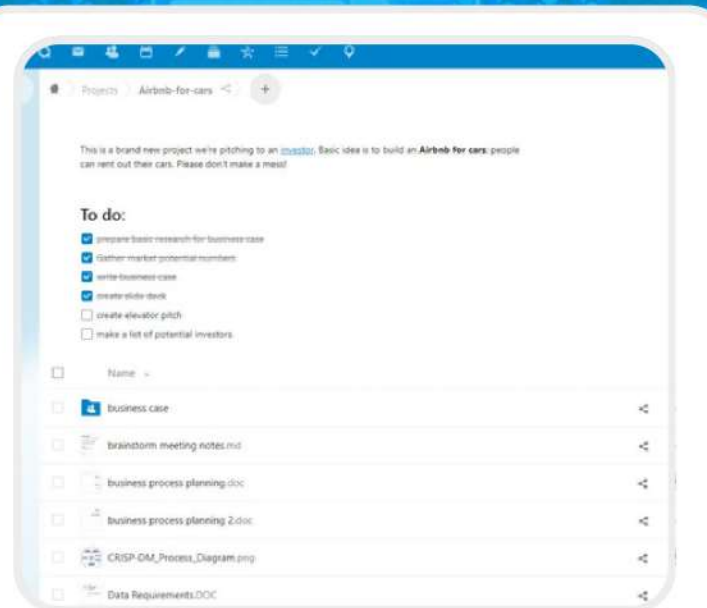

Rich workspaces

Workspaces bring context to your folders in Nextcloud. The space above a folder can be used for notes, todo lists, descriptions of automated flows that happen in that folder and much more. It is a great way to make sure you and your colleagues are on the same page.
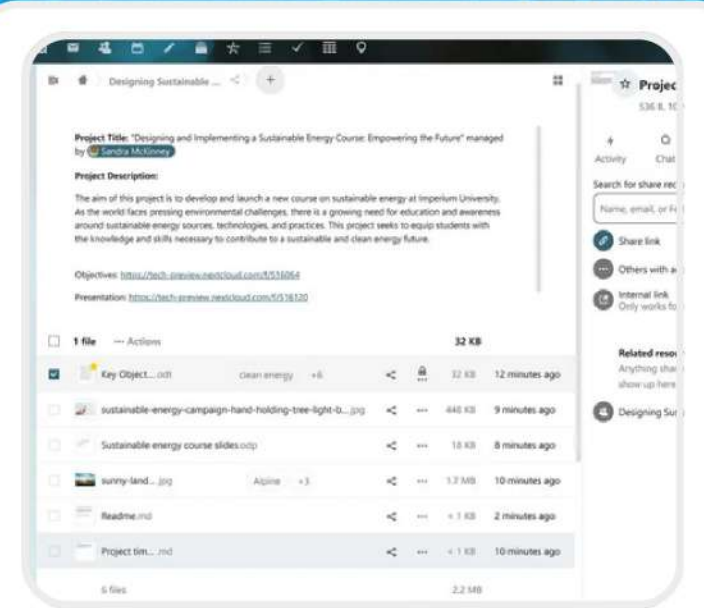

Lock files

File locking helps users prevent conflicts with colleagues who are trying to edit the same files. While office documents and notes can be edited in real time in the browser, some files have to be downloaded to make changes.
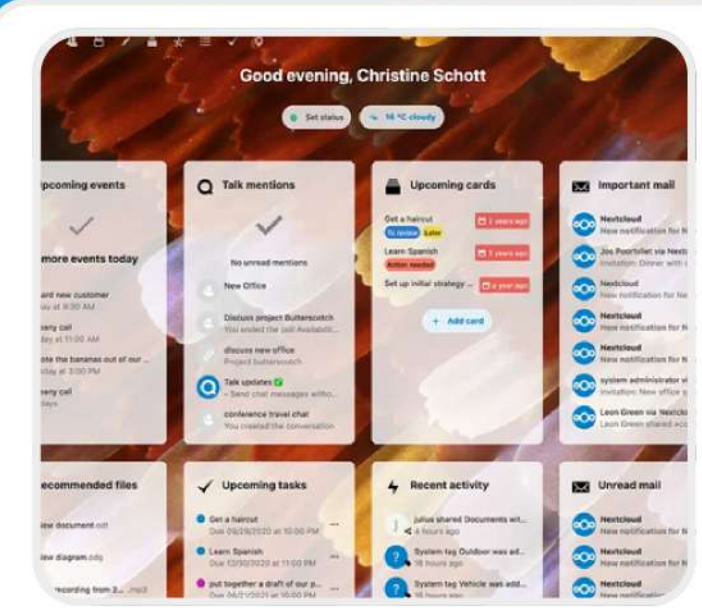

Find everything in one place

On the top-right of your Nextcloud window, a search glass shows search results from all over Nextcloud. Additional search providers can be installed and over a dozen different search providers are available to show you Github issues, Moodle courses, Jira tickets and more.

🦢 Swancloud Features: Collaboration

Swancloud Talk-Main Features

Nextcloud Talk lowers the barrier for communications and lets your team connect anytime, anywhere, on any device, with each other, customers or partners.

Healthy Meeting Culture

Nextcloud has honed in on what makes a healthy online culture – from meetings to file storage. This release brings you accessible, helpful and powerful tools that allow your work life to be less stressful, cluttered and overwhelming in Nextcloud Hub.

Unique protection

Nextcloud talk protects your communication better than other team collaboration platforms like Microsoft Teams or Slack, making sure your data stays on your servers. Nextcloud Talk goes further than other encrypted communication technologies by keeping even metadata from leaking. This ensures you stay in complete control of communications.
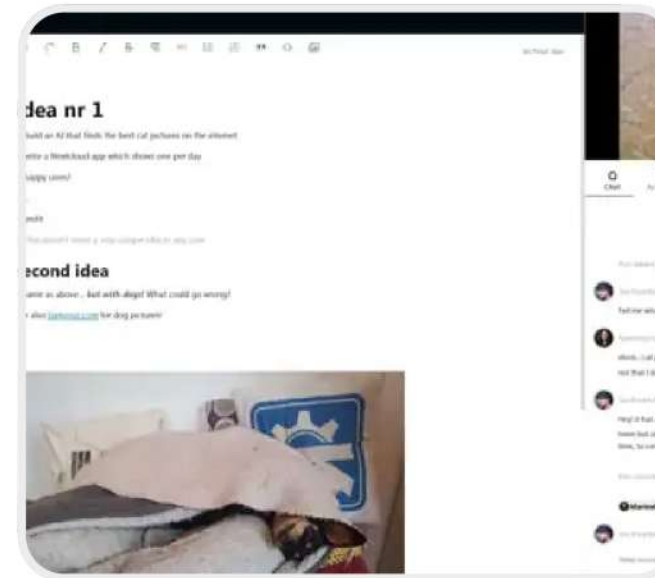

Designed for privacy

Nextcloud Talk is a fully self hosted, on-premises audio/video and chat communication service. It features web and mobile apps and is designed to offer the highest degree of security while being easy to use.
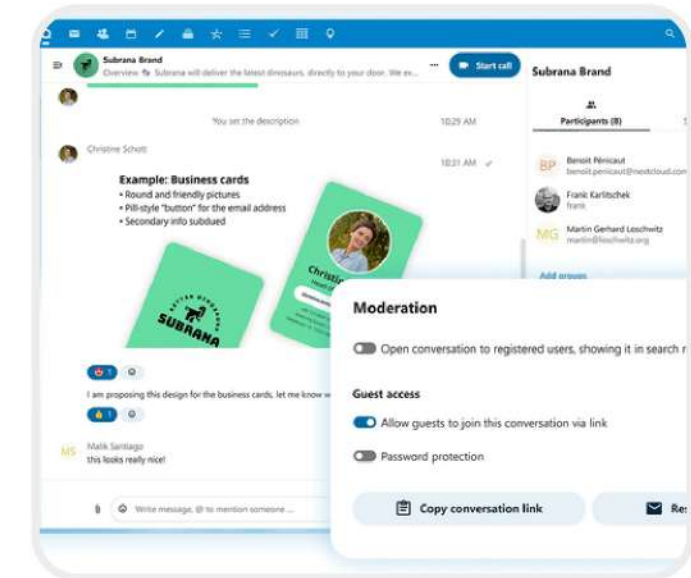

Private, group and public calls

Talk makes it easy to call customers and partners in one-to-one or group scenarios. Users can invite external chat participants with an URL into public rooms on the Nextcloud server.

Swancloud Features: Collaboration

Swancloud Talk-Main Features continued

Nextcloud Talk has many other features listed below for more understanding for talk available for desktop and mobile for all OS.

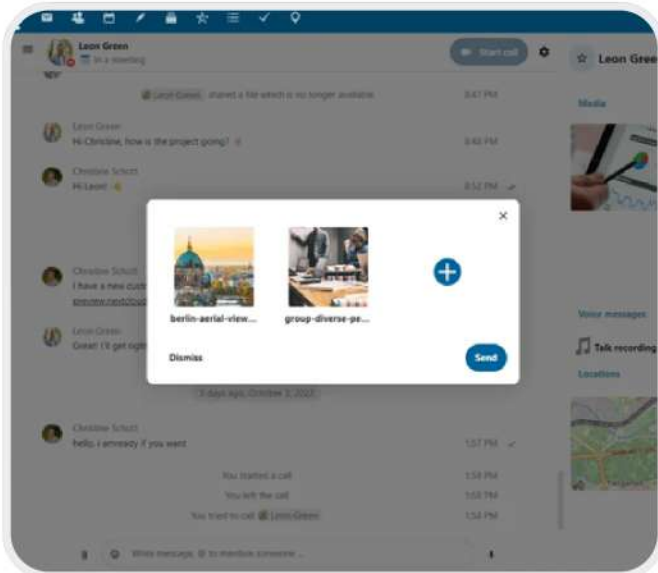

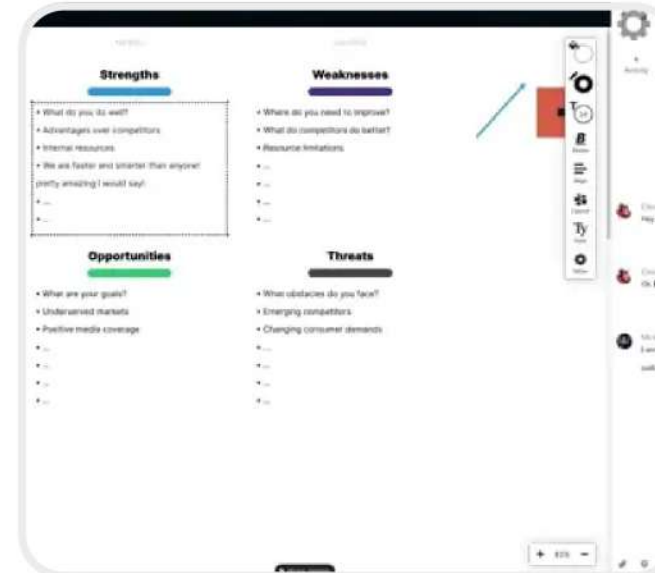

Collaboration within Nextcloud

Documents can be shared directly into a chat from the Files app and are made available to all participants, both users and guests. Projects integration enables linking of chat rooms with files, calendars, tasks and other resources for easy finding. Our online office solutions provide a sidebar with Talk for chat and calls with the participants.
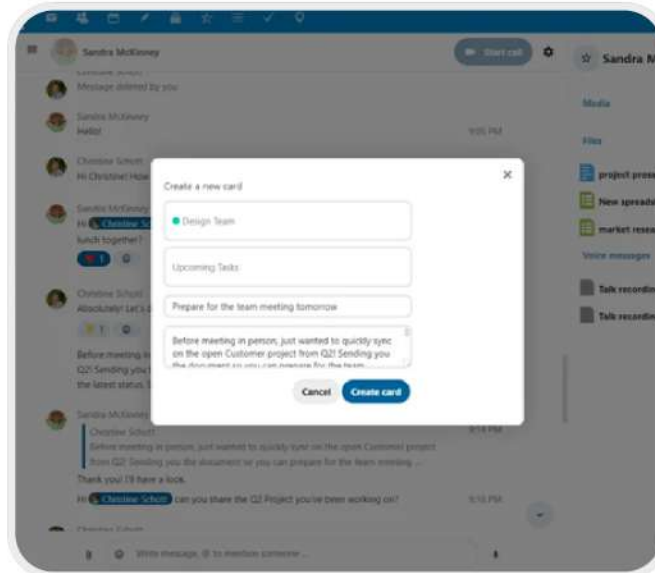

Integrated groupware, chat and project management

Nextcloud features tightly integrated chat, project management, mail, calendaring and more. Chat messages can be directly transformed into tasks, task deadlines are visible in the Calendar and files can be attached to a task from the sharing dialog.

Nextcloud whiteboard

One application that is very useful during audio/video calls or chat sessions is Nextcloud Whiteboard. It is a collaborative whiteboard with the ability for all participants to draw lines and shapes, take notes and write text, upload images, give a presentation and more.
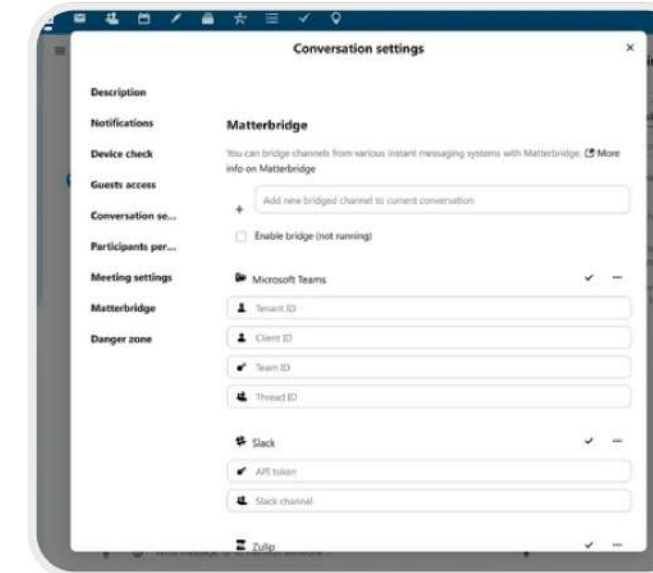

Bridging with other networks

Nextcloud Bridging allows the connection of Talk rooms to one or more channels on other Talk servers, but also other services like IRC, Slack, Microsoft Teams, Matrix, Mattermost, XMPP and many more.

1516, Devika Tower 6, Nehru Place, New Delhi, India-110019

🦢 Swancloud Features: Collaboration

Swancloud Talk-Main Features

rest of important features of Nextcloud Talk

Webinars and presentations

Share the content of a single window or a full desktop screen for presentations with chat-partners. Manage participants permissions for audio/video and screen sharing. Schedule meetings and be notified when they start. A lobby is provided for guests to wait until the call starts. Moderators can let a selected guest in early. Participants can raise their hand to get attention or be allowed to speak.

Video verification

In situations where extreme security is warranted and the identity of a recipient has to be verified with absolute certainty before they are granted access, Nextcloud includes the industry-first implementation of Video Verification.

Enterprise-ready

The Nextcloud Talk High Performance Backend for large organizations offers the capacity, reliability and features enterprises need to conduct their business privately, securely and efficiently.

Dial-in anywhere

Let participants join through a phone line, wherever they are.

No limitations

Improved connectivity behind firewalls and restrictive networks and more participants in a call

Get started quickly

Remote installation support from a certified Nextcloud engineer.

1516, Devika Tower 6, Nehru Place, New Delhi, India-110019

Swancloud Features: Collaboration

Swancloud Talk Compliance

A platform you can trust

Nextcloud Talk benefits from the many security, encryption and authentication capabilities of Nextcloud.

Multi-layered encryption, brute force protection, artificial-intelligence based suspicious login detection, password-less login and the backing of our USD 10.000 security bug bounty program provide customers the confidence that their communication and collaboration remains confidential.

GDPR, CCPA and more

The GDPR (General Data Protection Regulation) makes organizations liable for any violations of user privacy and deviations from a high data security standard.

Legislation like the CCPA (California Consumer Privacy Act of 2018) brings similar regulation to other countries.

Nextcloud has extensive GDPR compliance capabilities.

ePrivacy Regulation

The upcoming EU ePrivacy Regulation is designed as a complement to the GDPR. The objective is to reinforce trust and security in the Digital Single Market by ensuring that electronic communications from Europeans are confidential regardless of the technology used. The ePrivacy Regulation protects the confidentiality of electronic communications and information on devices, independently whether it is personal or non-personal data.
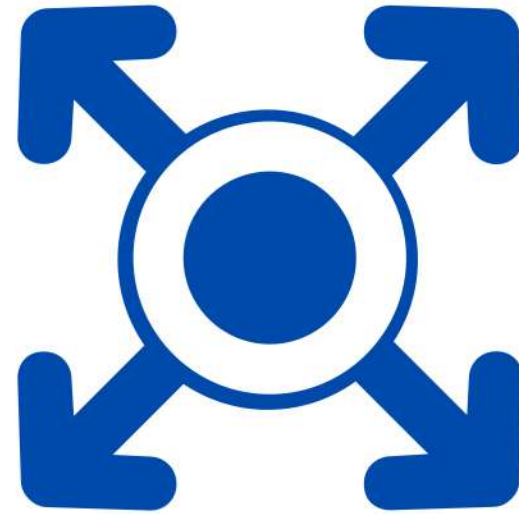

Nextcloud

info@kakinfotech.com   📞 18008890262   📞 +1-607-564-5334

1516, Devika Tower 6, Nehru Place, New Delhi, India-110019

Swancloud Features: Collaboration

Swancloud Talk Scalabibity

Easy for private use

Nextcloud Talk is designed for easy installation and operation. Nextcloud hosts a STUN server to facilitate usage behind firewalls and we recommend the installation of a local TURN server to improve connectivity further. Note that calls get fully routed through a TURN server, causing a lot of network traffic.

Scaling in enterprise setup

To help with scaling, Nextcloud lowers video quality automatically and disables video on large calls. Sending audio and video, as well as the compute power required to decode the video streams on clients, are the biggest limiting factors, with most asymetric internet connections bottlenecked on upstream bandwidth and laptops and mobile devices especially having trouble decoding multiple video streams.

High Performance Back-end

Webinars and other large scale broadcasting type calls are possible with hundreds or thousands of participants. The High Performance Back-end setup includes special features for this.

Swancloud Features: Collaboration

Swancloud Groupware

Swancloud Groupware integrates Calendar, Contacts, Mail and other productivity features

Easy access, anywhere

An efficient, modern and easy-to-use web interface for small or large teams. Less distractions and deep integration in other Nextcloud products means more productivity, wherever you are!

Ultimate security

An open source, self-hosted product. Emails, calendars and contacts are stored on your own infrastructure, without any third party ever gaining access.

Deep integration

Native integration into iOS, Android, macOS, Windows, Linux, Outlook and Thunderbird. Simple deployment, configuration and integration lower costs and decrease risk while leveraging your existing IT investments.
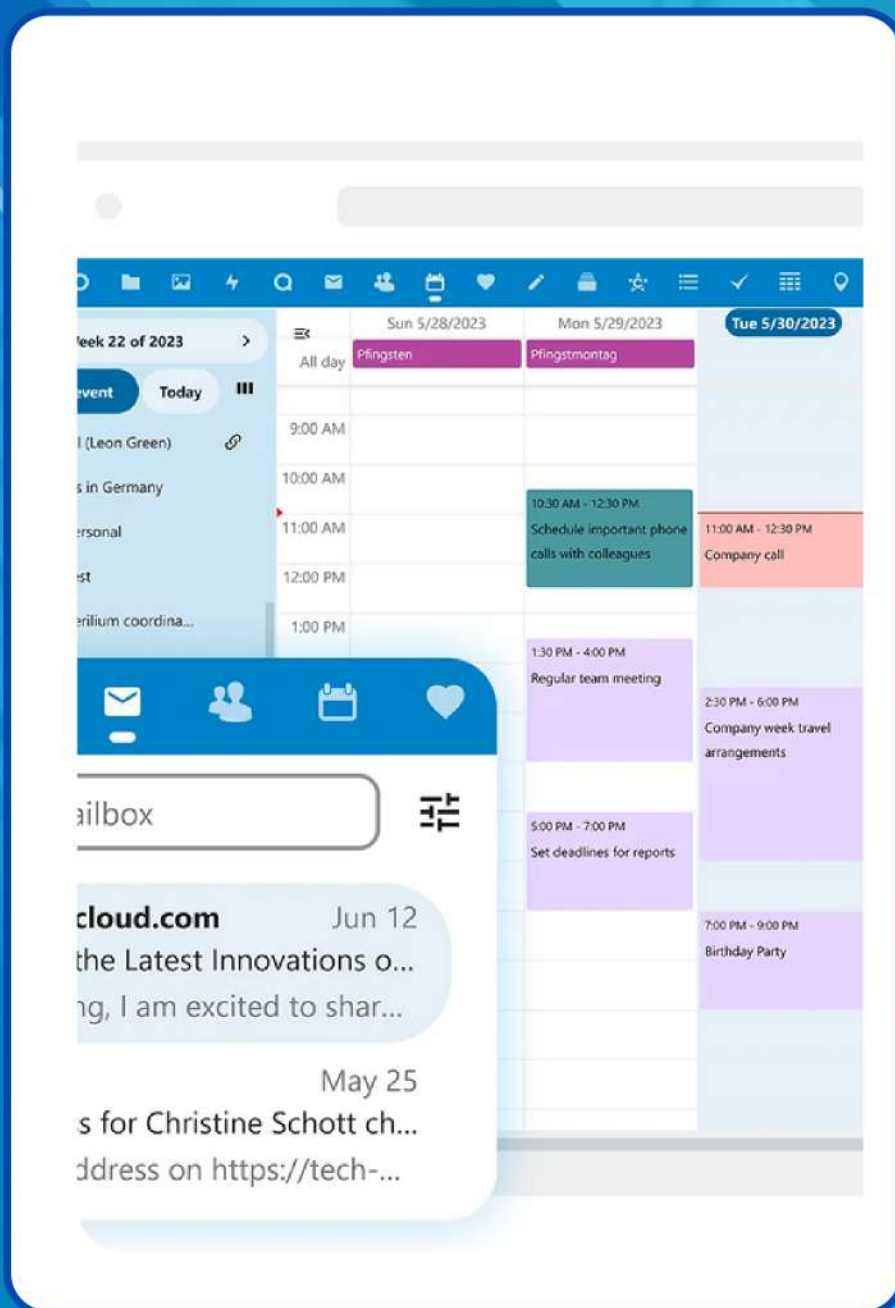

Nextcloud

Why Swancloud Groupware?

Nextcloud Groupware offers easy-to-use web mail, calendaring and contacts that helps your team get things done quicker and easier, integrated with Nextcloud Files.

✉ info@kakinfotech.com   📞 18008890262   📞 +1-607-564-5334

📍 1516, Devika Tower 6, Nehru Place, New Delhi, India-110019

Swancloud Features: Collaboration

Swancloud Groupware

Improve team productivity now with the leading content collaboration platform.
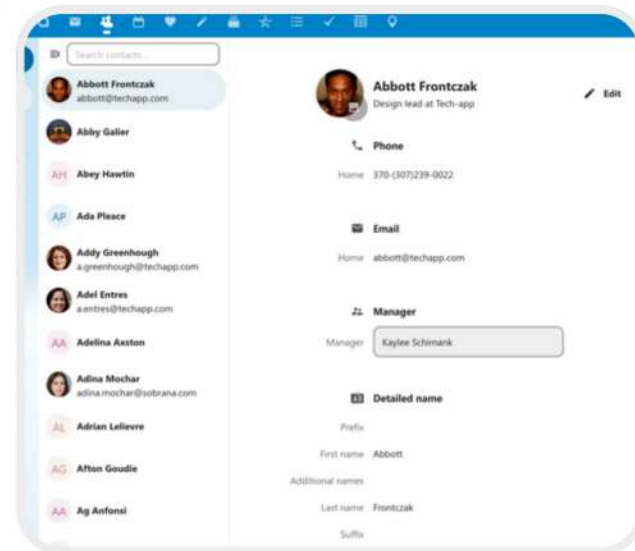

Single column design for Contacts app

Hub 5 brings a new single column design to Contacts for a more simple, approachable look. Each contact can easily still be edited and returned back to view mode. We hope you enjoy the new style!
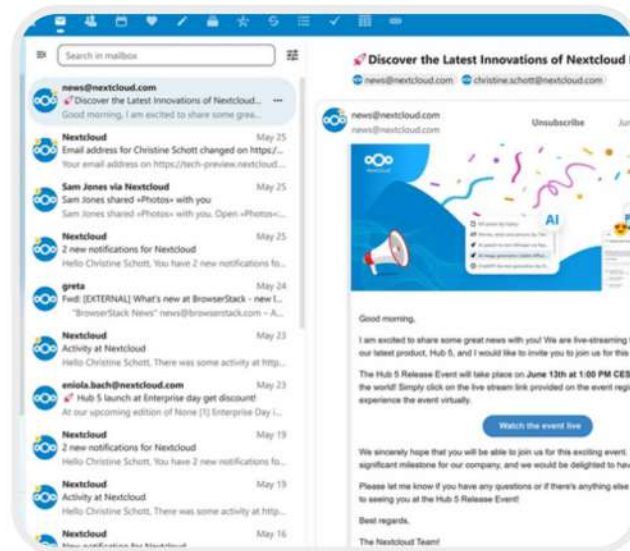

Mailbox management

Manage your incoming mail with options like creating subfolders, controlling subscriptions, and marking mail as read. Tailor your mailbox to how you work best.
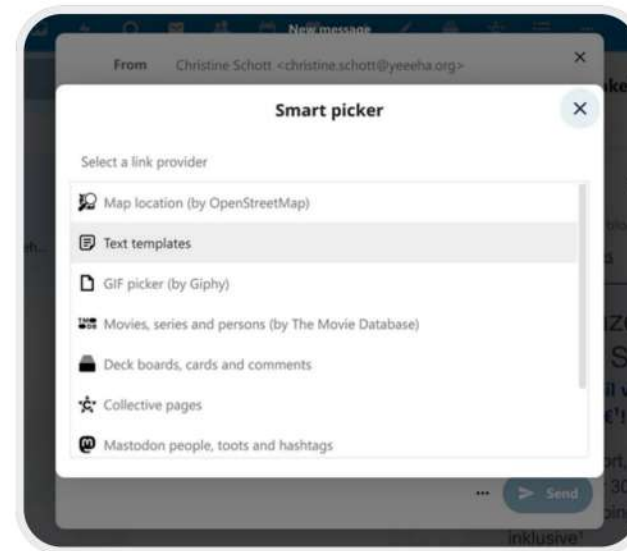

Intelligent features: Introducing the 'Smart Picker'

The best way to introduce our new, intelligent features is through the Smart Picker – a cross-application feature enabling users to use AI (and much more) in their daily work flow in a personal and collaborative way.
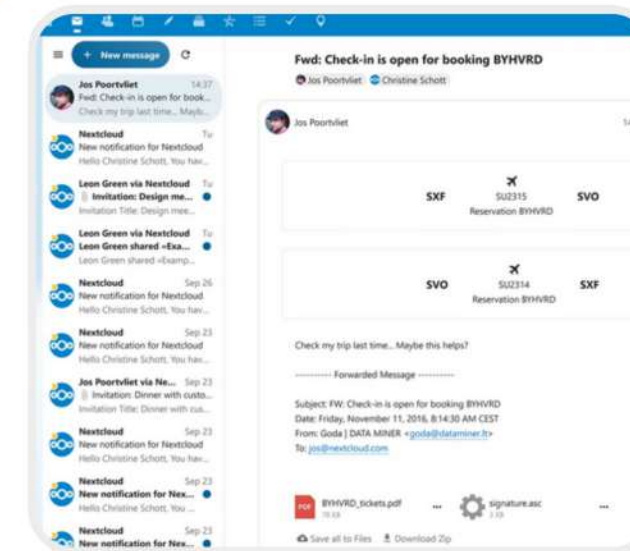

Adding an itinerary to the Calendar

Were your train or flight details sent to you? Keep them in a safe, organized way by importing details into your "personal" or "travel" customizeable folder.

Swancloud Features: Collaboration

Swancloud Groupware

Improve team productivity now with the leading content collaboration platform continued...
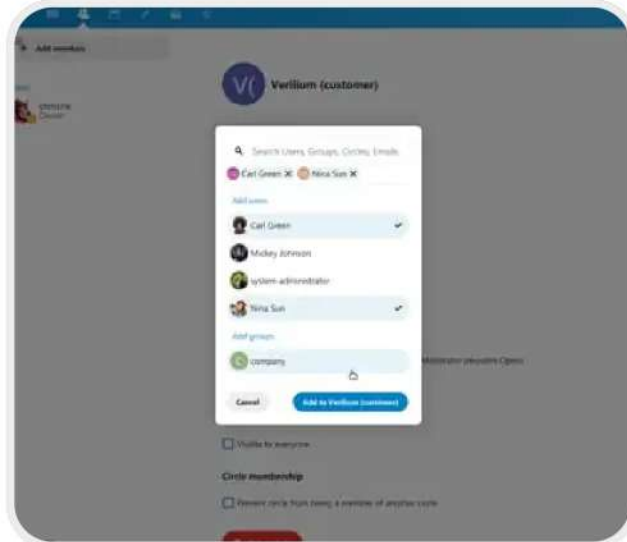

Circles and Groupfolders – custom group management

In Contacts, users can define their own, custom groups, named Circles. These can be managed in various ways, including with invitations, through an open listing where users can join with or without an approval step, with designated sub-managers and so on.

Microsoft integrations

Nextcloud Enterprise is designed to integrate well in Microsoft environments, with file storage, user directory, Outlook, Sharepoint, Windows Desktop, MS Office online server and Teams integrations available.

Integrated apps

Swancloud Mail

Swancloud Calendar

Swancloud Contacts

Swancloud Deck

Nextcloud

Swancloud Features: Collaboration

Swancloud Groupware

Unique Advantages

Integrated groupware, chat and project management

Nextcloud features tightly integrated chat, project management, mail, calendaring and more. Chat messages can be directly transformed into tasks, task deadlines are visible in the Calendar and files can be attached to a task from the sharing dialog.

A single platform means there is no need to juggle different accounts, keep track of where in the many cloud platforms the latest version of a document is floating around, or worry about security threats and invisible costs.

Nextcloud fluently integrates into your existing infrastructure while also providing its own. Note that Nextcloud Mail is a client for IMAP-infrastructure; Nextcloud does not include a mail server.
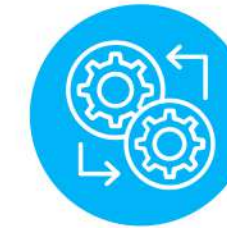

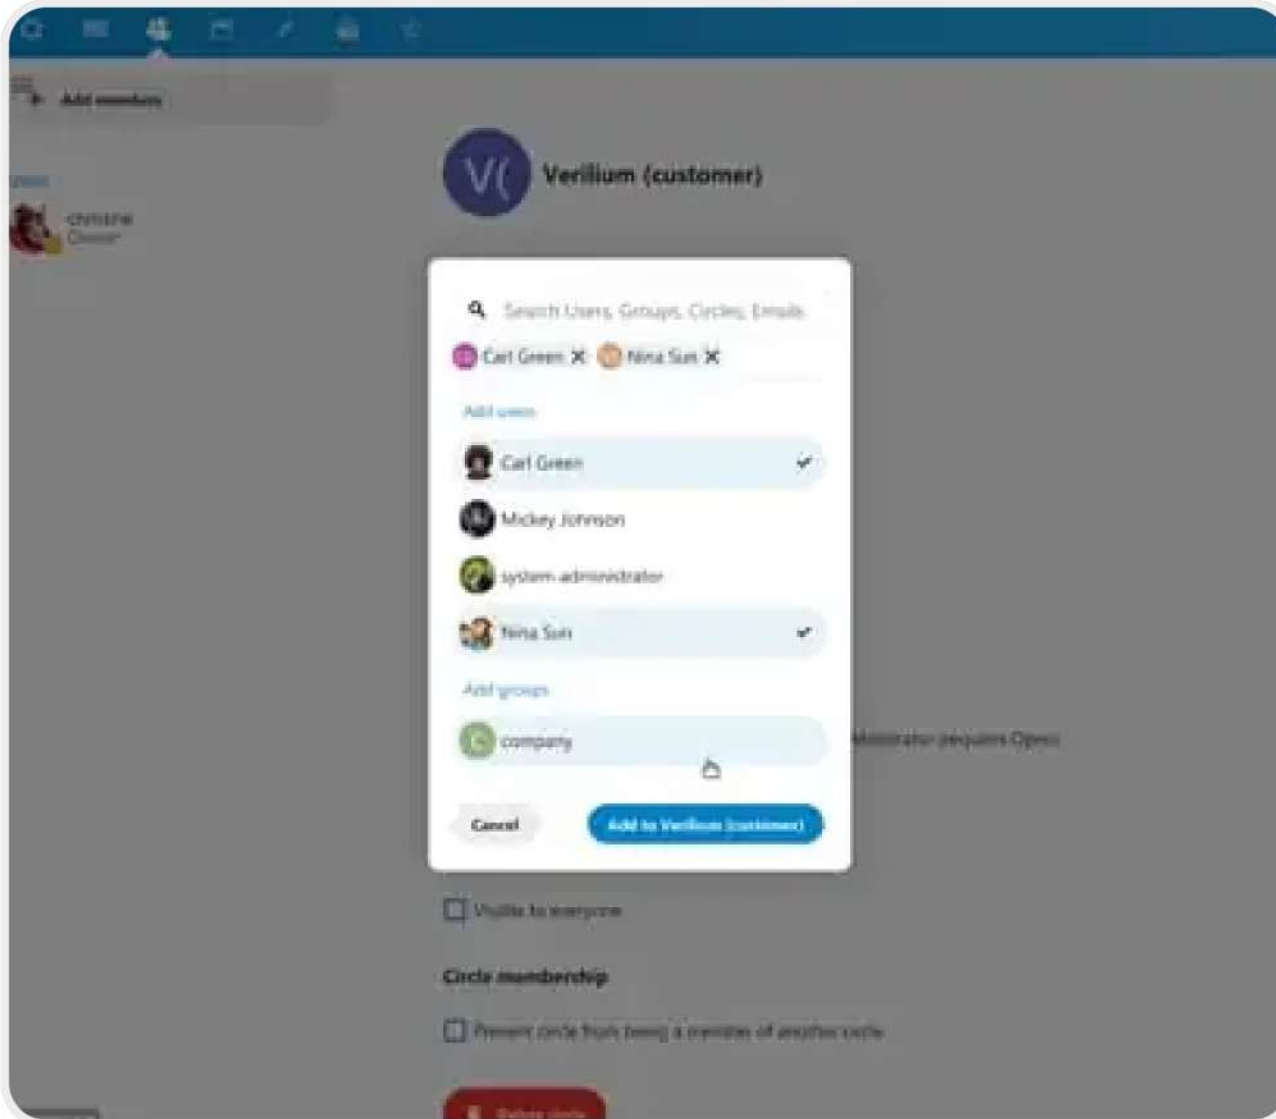

Integration

🦢 Swancloud Features: Security
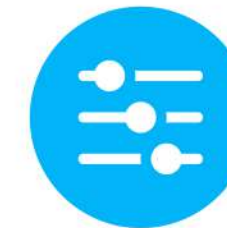

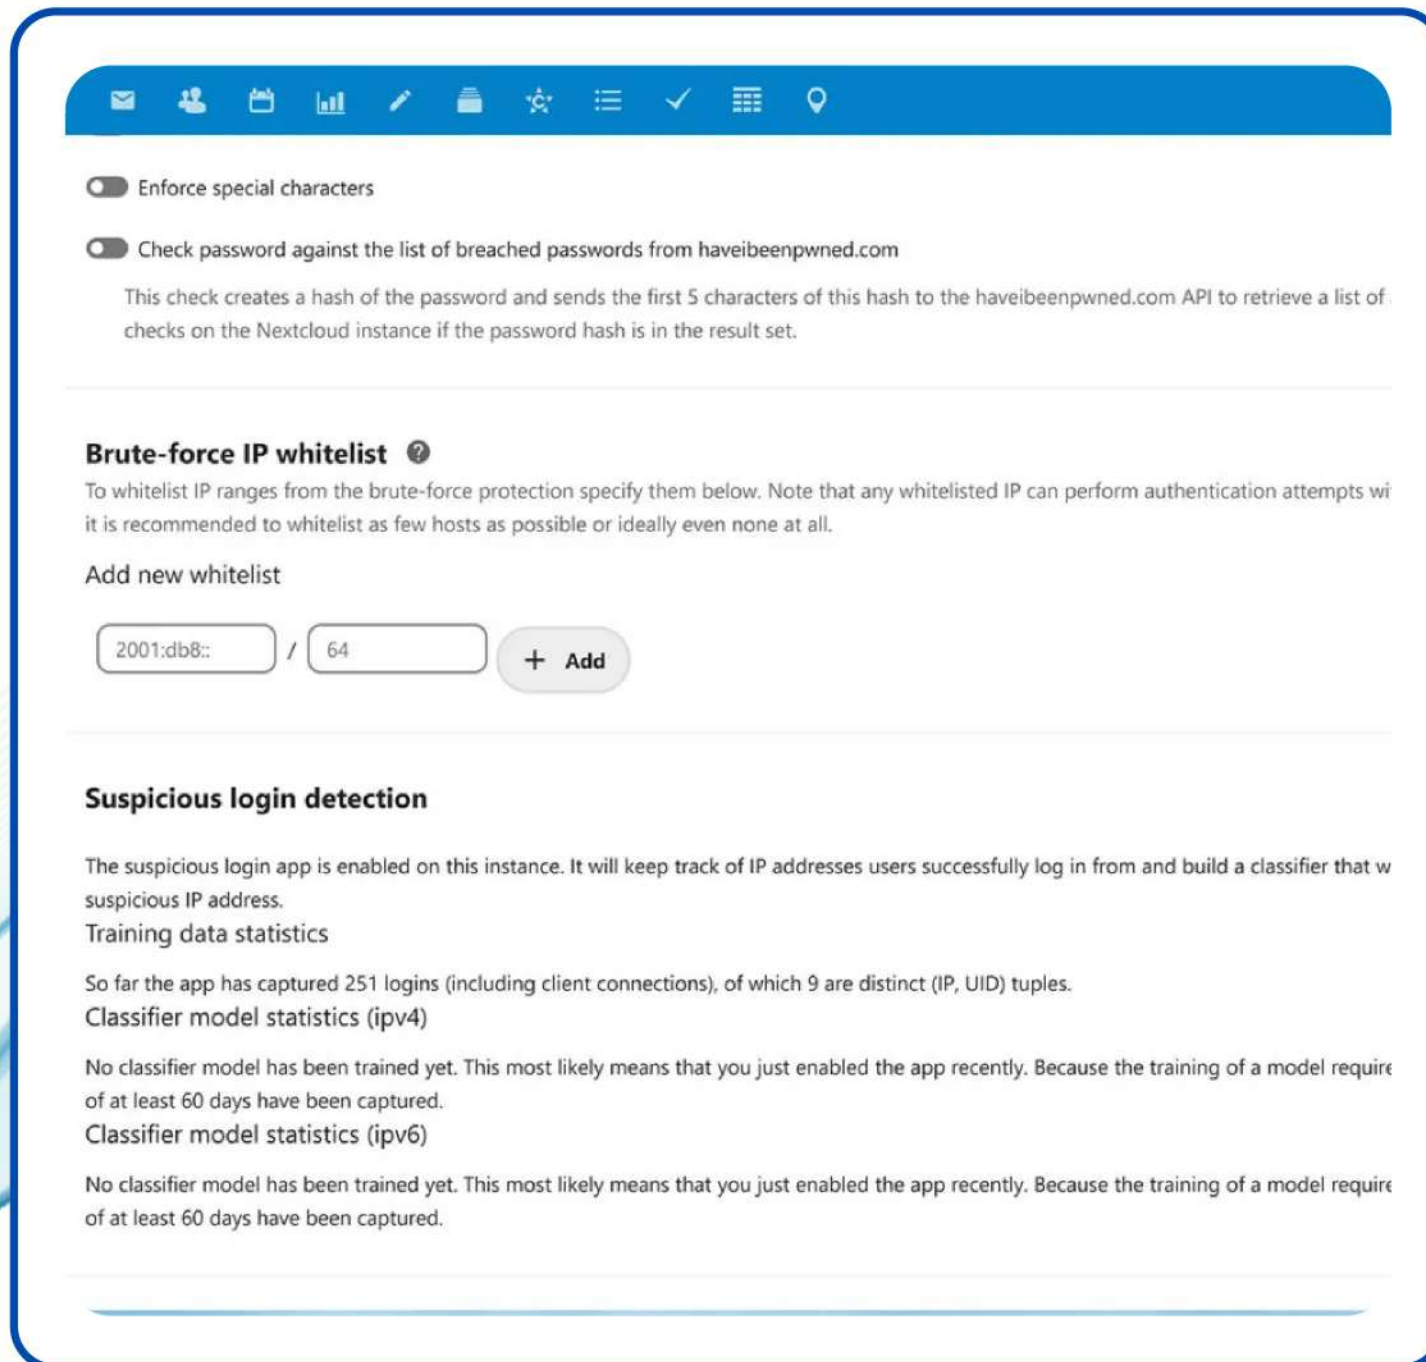

Swancloud Brute Force Protection

Brute Force Protection logs invalid login attempts and slows down multiple attempts from a single IP address (or IPv6 range). This feature is enabled by default and protects your self-hosted collaboration platform against an attacker who tries to guess a password from one or more users.

Password reset tokens are invalidated when critical information like user email has been changed to protect against phishing attacks.

Nextcloud will ask system administrators for password confirmation on security critical actions.

Swancloud Features: Customization

Swancloud : Branding & Theming

Easy, integrated branding support for enterprise customers

In order to provide a seamless enterprise user experience, Nextcloud offers branded clients to their customers. As part of this we support deployment technologies like MSI for desktops and MDM for mobile platforms.

- ✓ Logo, colors, login graphics and name

- ✓ Add custom links for privacy policy, imprint and terms of service

- ✓ Default / example files every user gets on first login can be modified

- ✓ Mobile apps and web interface adjust to theme settings, except app icon on mobile)

This feature will work for Dedicated Nextcloud Instance

Swancloud Features: Client

Desktop client

Sync and collaborate on your desktop or laptop
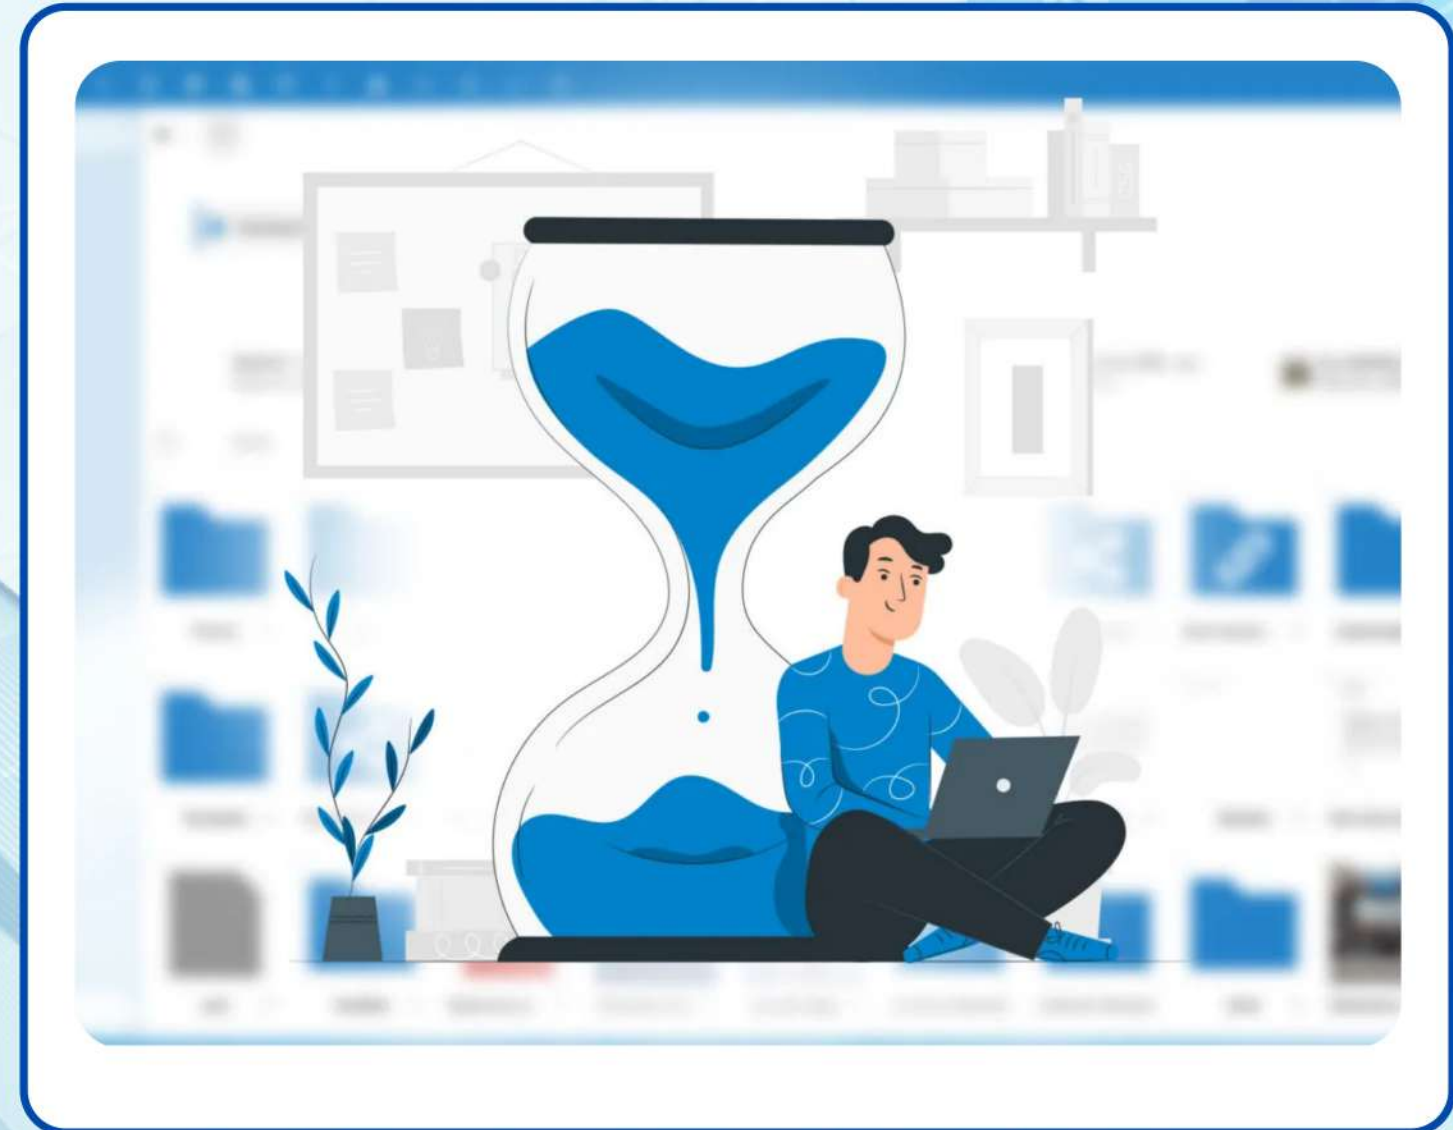

The Nextcloud desktop client keeps photos and documents always up to date, enabling you to work like you always did.
Any file you add, modify or delete in the synced folders on your desktop or laptop will show up, change or disappear on the server and all other connected devices.

Swancloud Features: Protection

Accessibility, Encryption, Protection & Storage

Dyslexia font

To ensure Nextcloud is accessible to users with visual impairments, Nextcloud has extensive keyboard accessibility and screen reader support.
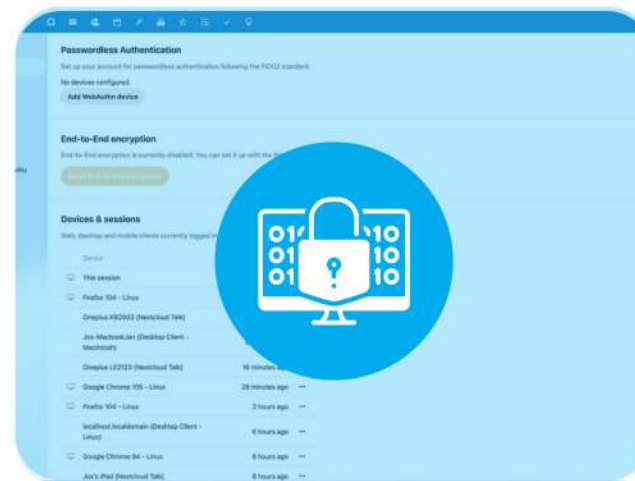

End-to-end encryption

Protecting data from source to destination

Nextcloud features an enterprise-grade, seamlessly integrated solution for end-to-end encryption. It enables users to pick one or more folders on their desktop or mobile client for end-to-end encryption. Folders can be shared with other users and synced between devices but are not readable by the server.

Cryptographic Identity Protection

Every user gets a unique public/private key combination when they first enable end-to-end encryption. The public key is sent to the server and signed into a certificate. The certificate is checked by the users' other clients and used by other users to share encrypted files with the first user, based on Trust On First Use.
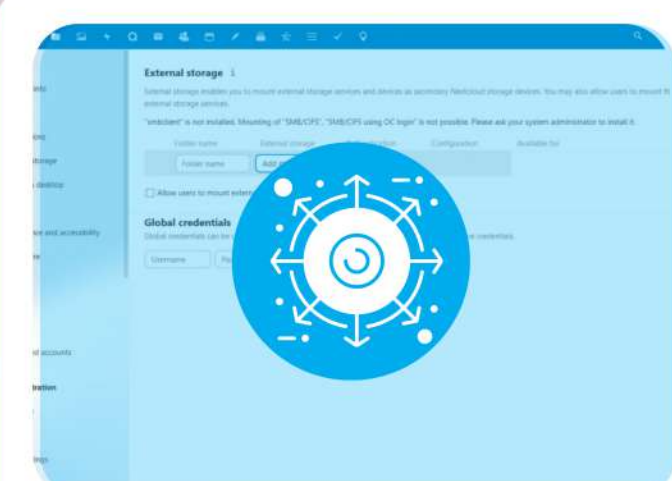

External storage

Securely access your data anywhere

Access existing storage silos like FTP, Windows Network Drives, SharePoint and Samba shares seamlessly through Nextcloud. Protect and optimize data usage in line with compliance and company policy by controlling sharing and performance for each external storage system.

Swancloud Features: Data

File Version, Search, Architecture & Accessibility
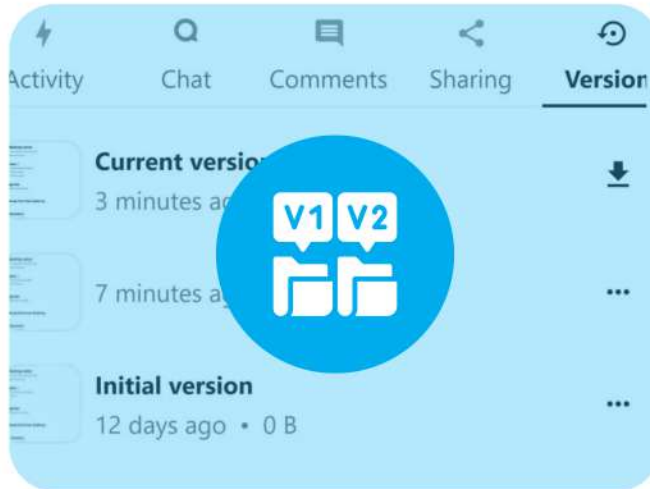

DATA LOSS PREVENTION

File versioning, restore and retention control

File retention and deletion can also be controlled based on tags set manually or automatically, ensuring legal or practical requirements for the longevity of data lifespans can be enforced.

SEARCHING, COLLABORATION

Full-text search

Nextcloud includes a powerful full-text search engine capable of using ElasticSearch as back-end. Its flexible plugin-based interface enables search capabilities beyond files and accommodates other back-end solutions like Apache Solr.

ARCHITECTURE

Global Scale

Extreme scalability at commodity cost

Nextcloud Global Scale delivers a true globally scalable solution for deployments with hundreds of millions of users, giving unprecedented control over the locality of data and delivering dramatic cost reduction

ACCESSIBILITY

High contrast mode

To ensure Nextcloud is accessible to users with visual impairments, Nextcloud has extensive keyboard accessibility and screen reader support.

Nextcloud Backup

info@kakinfotech.com   18008890262   +1-607-564-5334

Swancloud Features: Administration

## File Version, Search, Architecture & Accessibility

ADMINISTRATION

LDAP/Active Directory user management

Integrated account management

Nextcloud features integration with external user directories like LDAP, Active Directory or others as well as built-in account management, two-factor authentication and Single-sign-on support.

ACCESSIBILITY

Light/Dark theme support

To ensure Nextcloud is accessible to users with visual impairments, Nextcloud has extensive keyboard accessibility and screen reader support.
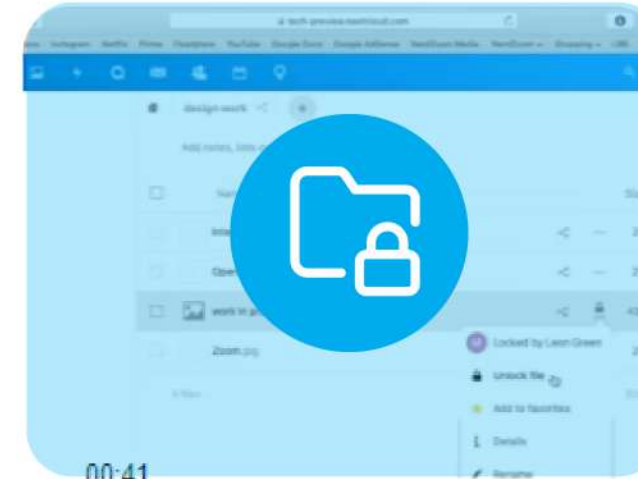

COLLABORATION

Locking files

File locking helps users prevent conflicts with colleagues who are trying to edit the same files. While office documents and notes can be edited in real time in the browser, some files have to be downloaded to make changes. Lock the file and collisions are avoided! Other users can easily contact you in chat or by a comment to ask what is going on.
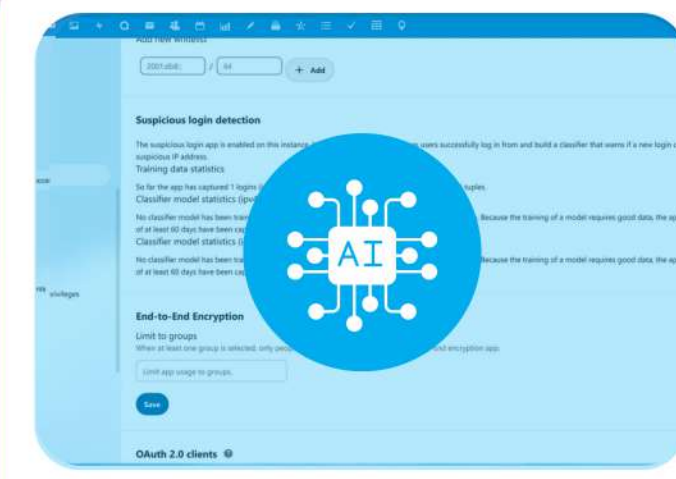

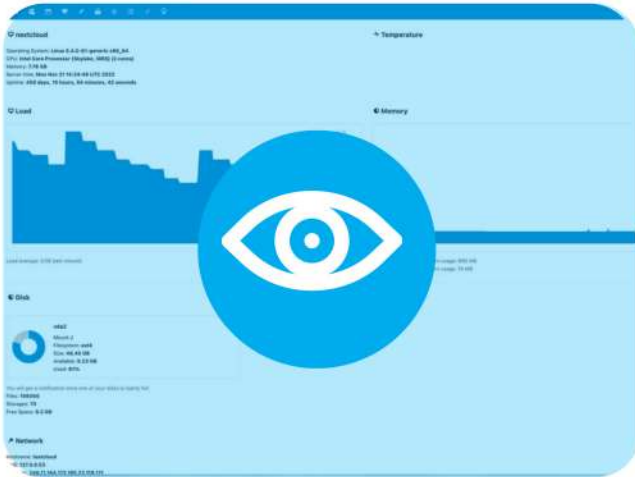

SECURITY, AI

Machine learning based suspicious login detection

Nextcloud includes a machine learning technology which trains a neural network on successful logins on the instance and uses it to classify login attempts. Should it detect a login classified as suspicious by the trained model, it will notify the user and store an entry in the log for the system administrator.

Swancloud Features: Administration

Administration, Security, Tracking & Collaboration

ADMINISTRATION, SECURITY

Monitoring and auditing

Nextcloud has your back with our Server Information, Activities and Auditing apps.

With your file sync and share solution central to the productivity of hundreds, thousands or even millions of users it is crucial to have an overview of its performance and service. Your users want to know what is happening to their files. And last but not least, so does your legal department!

ADMINISTRATION, SECURITY

Auditing logs

Nextcloud logs data in the nextcloud.log file provided in the root of its data directory. You can optionally record a full audit trail in a separate audit log file. This can be used by Data Loss Prevention and Mobile Device Management tools as user agent information is available alongside extensive user, IP and date/time logs.
Audit logs provided include user session information, file handling, user management, sharing and other actions.
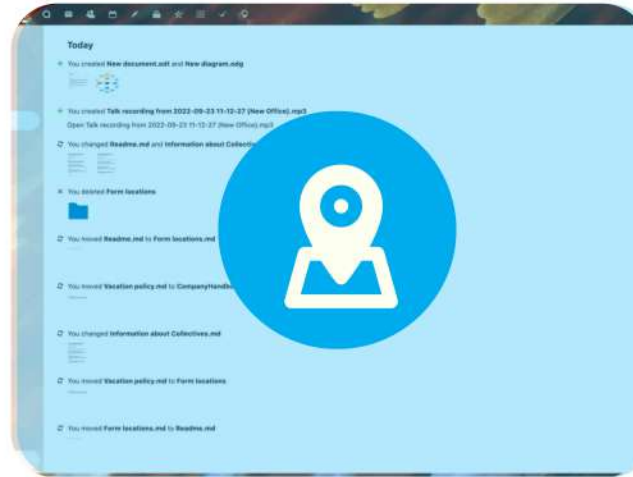

ADMINISTRATION, SECURITY

Track file activity

The Nextcloud Activity app gives users a clear view on what is happening with their files. It provides users with an overview of recent changes like:
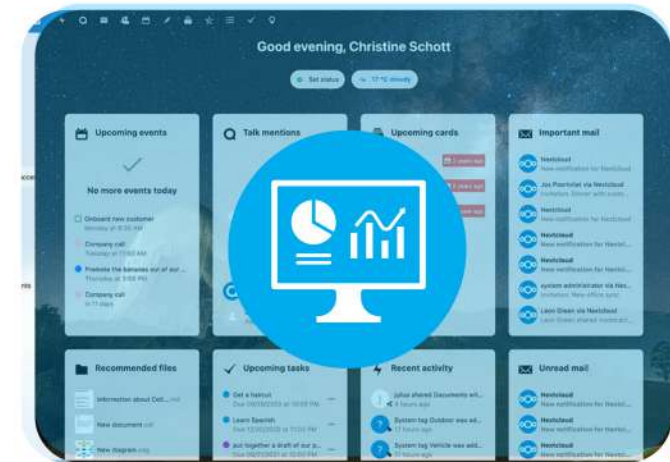

COLLABORATION

Nextcloud Dashboard

A great way to start your day

The Nextcloud Dashboard is your starting point of the day, giving you an overview of your upcoming appointments, urgent emails, chat messages, incoming tickets, latest tweets and much more! Users can add the widgets they like and change the background to their liking.

Nextcloud

Swancloud Features: Administration

Only Office, Remote Wipe, Screen Reader, Secure View

ONLYOFFICE integration

Self-host secure office document collaboration with ONLYOFFICE

ONLYOFFICE integration in Nextcloud empowers your users to collaborate on office documents with team members in real time.
Compatibility with Microsoft Office formats means perfect documents, every time.
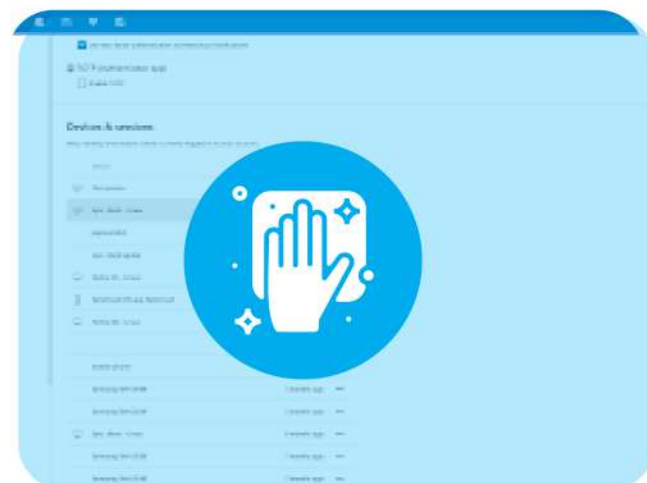

Remote Wipe

Data Loss Prevention

Clean data and accounts from the client

While Nextcloud supports Mobile Device Management solutions, thanks to built-in support, remote wipe will work on systems not under management of the company. This is useful for home users but also large universities and of course in a scenario where guest accounts were handed to a third party.

Screen reader support

Accessibility

To ensure Nextcloud is accessible to users with visual impairments, Nextcloud has extensive keyboard accessibility and screen reader support.
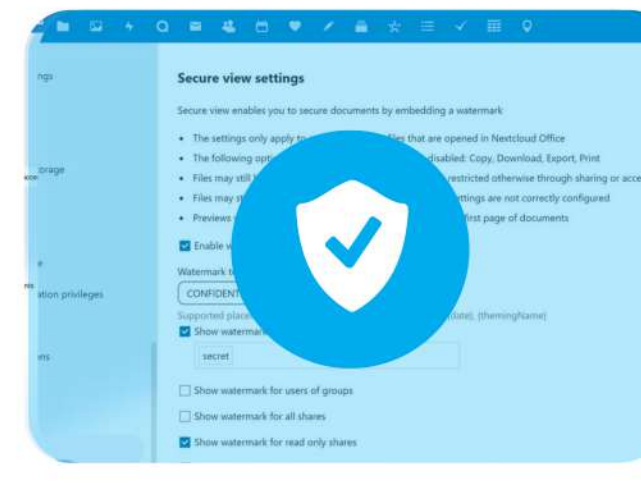

Secure view

Nextcloud Dashboard

Security

With secure view, our online office solutions can be configured to open PDF files, images and text files, making these files available in a watermark-protected way, while downloads and other apps are disabled using File Access Control. This setup is useful when data has to be protected from leaking but still has to be made available for review, as in a virtual data room scenario.

Nextcloud

Swancloud Features: Administration

Encryption, Collaboration, sharing & Security

Server-side encryption with flexible key handling

Encryption

Nextcloud supports pluggable encryption key handling. If you have an external key server or Hardware Security Module, these can be made to work with Nextcloud.
Our default encryption key handling enables administrators to set a system wide recovery key for encrypted files,. This ensures that, even when users lose their password, files can always be decrypted.

Set your status

🍴 Having Lunch 🏠 Working from home 📞 Calls all day

Collaboration

On top of the dashboard, users can set their status, to show to colleagues what they are up to – traveling, working from home, concentrating, and so on. This status is then visible in Talk and other apps and it can automatically clear after a set time, so your colleagues do not think you are commuting for a whole day!
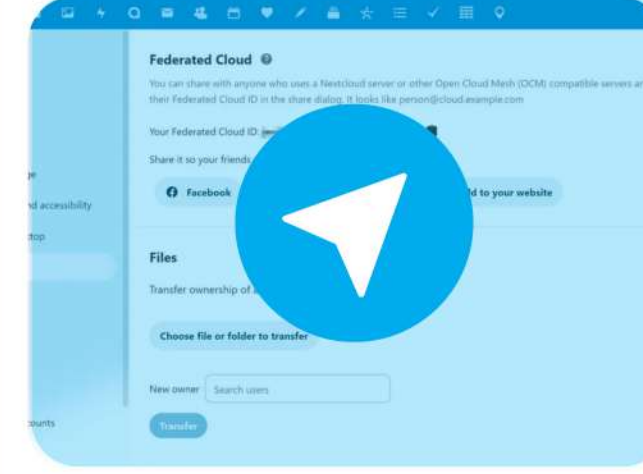

Share across Nextclouds (Federation)

Sharing

Sharing files across Nextcloud servers is as easy as sending an email from a Gmail address to a Yahoo account! Instead of an email address, you use a Federated Cloud ID.
To share a file, enter the Federated Cloud ID in the 'share' dialog. A notification will pop up on the Nextcloud server of the recipient.
You can find your own Federated Cloud ID in your user settings. Give it to your friends so they can share files with you!

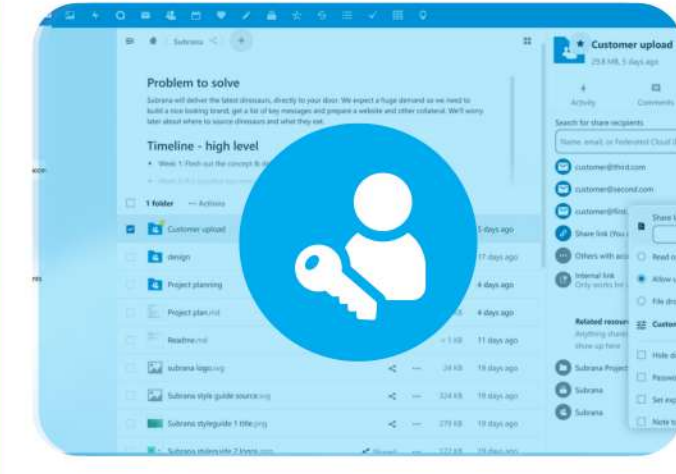

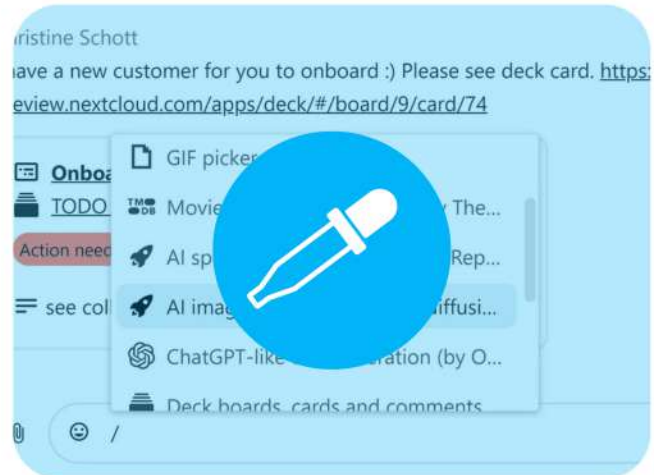

Sharing permissions

Sharing & Security

Securely sharing and collaborating on documents requires strong access control mechanisms. Nextcloud features a variety of sharing mechanisms and associated control solutions like ACLs and sharing permissions.
The basic sharing model in Nextcloud follows a flat model where users are in control of the sharing. Any file or folder can be individually shared and access permissions can be configured. New files show up in the home of users whom you share with.

KAK Infotech

Picker, Two FactorAuthentication, Search& Virtual Data
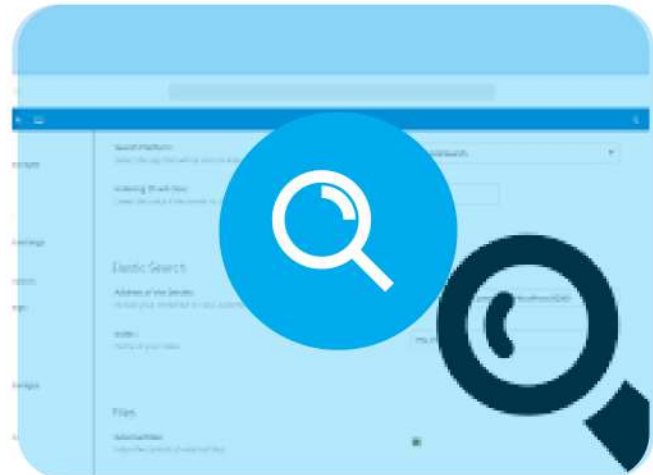

Smart picker

Usability

The Smart picker allows inserting a huge variety of content in many places like documents, tasks, emails or chat rooms. Examples include tables, links to chat rooms, youtube videos, gifs and more. The Smart Pickers also include abilities like dictation, translation and more. The selection of Smart Pickers continues to expand.

Two-factor authentication

Security

Nextcloud includes a variety of second factors like TOTP, U2F and SMS gateways. 2-factor authentication can be enforced and user sessions and devices can be managed.
Nextcloud is also among the first in the industry to provide support for the WebAuthn standard, enabling password-less authentication and support for Windows Hello, various FIDO2 keys and other standards-compliant authentication devices.

Unified search

Find everything in one place

On the top-right of your Nextcloud window, a search glass shows search results from all over Nextcloud. Additional search providers can be installed and over a dozen different search providers are available to show you Github issues, Moodle courses, Jira tickets and more

Virtual data room

Keep your data close

M&A transactions, loan syndication, private equity and venture capital transactions require the utmost confidentiality. And all that without any data leaving your organization.
Forget about SAAS and outsourcing: an on-premises Nextcloud VDR offers the ease of use that speeds up deal making while strict control over access and fine grained auditing ensure sensitive data remains secure.
